

ABSTRACT OF THE DISCLOSURE

A document reading device includes a reading unit for reading an image of a document, a document size detector for detecting a size of the document, and a controller for controlling the reading unit to read the image of the document in a read size corresponding to the document size confirmed from a detection result of the document size detector. Particularly, the controller includes an operation panel for inputting and outputting various information, and a CPU for requesting designation of a document size via the operation panel when the document size is not confirmable from a detection result of the document size detector and specifying the read size corresponding to the document size which is designated via the operation panel according to the request.
